I am an experienced and skilled .NET developer with a deep understanding of the framework and its associated technologies. I am proficient in designing, developing, and maintaining robust applications. My expertise lies in leveraging C#, ASP.NET, and SQL Server to create scalable and efficient systems that meet business requirements. I am passionate about staying updated with the latest industry trends and continuously enhancing my skills to deliver cutting-edge solutions.

Experience

AUGUST 2023 – JANUARY 2024

[Back-End Developer](#) / Intology, Remotely.

As a backend developer on a warehouse management system project, I utilized ABP framework to streamline operations, optimize inventory management, and enhance order processing efficiency. Collaborating with cross-functional teams, I designed and implemented a reliable and scalable backend infrastructure to support the smooth operation of the warehouse.

SEPTEMBER 2018 – JANUARY 2023

[Dot Net Developer](#) / Robotic Mind, Syria, Lattakia

As a backend developer, I worked on diverse projects, including a car parts store and a service company. I played a vital role in designing the database, integrating the frontend design, and connecting the Android application with the backend code. The goal was to develop efficient systems, ensuring smooth operations for the car parts store and the service company, enhancing user experience, and driving business growth.

Skills

Dot Net Framework • SQL Server • C# • HTML • Web Services • Dot Net Core • Dot Net MVC • ABP Framework • Git • Azure boards

Education

FEBRUARY 2024 - PRESENT

[Master's degree, Master in Web sciences](#)/Syrian Virtual University
